

1 Introduction

This language is used to write sheet music for guitar tabs. Maybe in the future it'll be able to write normal sheet music as well!

2 Design Principles

I want the language to be as simple and intuitive as possible. The syntax is very simple, and a lot of the formatting is taken care of by the evaluator, which means that there are default values for a lot of parameters, making life easier for the user.

3 Example Programs

Minimal example:

-type tab -time 4-4 -key c

1: 3e4 4g 1g 2: 5a 1f

Output:

4 Language Concepts

5 Syntax

6 Semantics
